**AN ORDINANCE OF STEWARTSTOWN BOROUGH, YORK COUNTY,  
PENNSYLVANIA ESTABLISHING RULES AND REGULATIONS FOR THE  
DISCHARGE OF FIREARMS, BOWS, CROSSBOWS AND ATLATLS**

---

**WHEREAS**, Stewartstown Borough (the “Borough”) respects the individual rights of Borough residents to possess, transfer, and discharge a firearm in a manner consistent with existing state and federal law; and

**WHEREAS**, the Borough has determined that it is in the best interests of the health, safety and welfare of the residents of the Borough, and that it is hereby declared to be the policy of the Borough to safeguard its residents by regulating the discharge of a firearm, bow, crossbow and atlats in areas near residences and other occupied structures in order to promote the safety of Borough residents.

**NOW THEREFORE, BE IT ENACTED AND ORDAINED**, by the Borough Council of Stewartstown Borough as follows:

**SECTION 1: Definitions.**

**FIREARM** - A weapon from which a dangerous projectile may be expelled by an explosive, gas, or air. Whether or not the weapon is dangerous enough to be encompassed by this chapter is left to the discretion of the law enforcement officer. Examples include but are not necessarily limited to the following: shotgun, muzzle-loading long guns, rifles and pistols of any caliber.

**ATLATL** - A fifteen-inch-to-thirty-inch board or rod-like device with a handle at the aft end and a projection (as a hook or thong to hold a dart in place until released) at the fore end, used for propelling a dart by increasing the mechanical advantage of the user's forward arm motion. This device derives its propulsive energy solely from the forward motion of the user's arm and the bending and recovery of the dart. The energy used to propel the dart may not be derived from any other source.

**BOW** - A device for launching an arrow, which derives its propulsive energy solely from the bending and recovery of two limbs. The energy used to propel the arrow may not be derived from another source.

**CROSSBOW** - A device consisting of a bow fixed transversely on a stock, the string of which is released by a trigger mechanism, has a mechanical safety and propels an arrow.

DART - A flexible projectile propelled by an atlatl with an overall length between five and eight feet, fletching at the aft end (designed only for guidance) and a broadhead mounted at the fore end. No electronic device may be part of or attached to the dart. No device, material or system capable of causing damage or injury to the animal in excess of that inflicted by the cutting edges of the broadhead may be part of or attached to any dart.

**SECTION 2: Discharge of Firearms Restricted.**

- A. It is unlawful for any person in the Borough whatsoever to shoot or discharge any Firearm within 150 yards of any occupied dwelling house, residence or other building or camp occupied by human beings or any barn, stable or other building used in connection therewith, unless permission has previously been obtained, and continues to be in effect, from the owner(s) of the structure(s) referred to in Subsection B.
- B. It is unlawful for unauthorized persons to discharge a Firearm in the Borough. Only the following enumerated persons are authorized and may lawfully discharge Firearms in the Borough, so long as any discharge occurs farther than 150 yards from any occupied dwelling house, residence or other building or camp occupied by human beings or any barn, stable or other building used in connection therewith, unless permission has previously been obtained, and continues to be in effect, from the owner(s) of the structure(s) referred to in this Subsection B:

- E. Target practice. It is unlawful to discharge any Firearm at any target which shall have insufficient backstop to prevent the projectile from leaving the property

upon which it is being expelled. The person shooting the Firearm at any target shall be responsible for assuring that the backstop is sufficient to prevent any projectile from leaving the property upon which it is being shot. All targets shall be located a minimum of 150 yards from any occupied dwelling house, residence or other building for human occupancy or any barn, stable or other building used in connection therewith, unless permission has been obtained, and continues to be in effect, from the owner(s) of the structure(s) referred to in this Subsection E.

The person shooting the Bow, Crossbow or Atlatl at any target shall be responsible for assuring that the backstop is sufficient to prevent the projectile from leaving the property upon which it is being shot.
